Exporting the Murraylands

The Exporting the Murraylands project is the second stage to the Murraylands Export Identity Project. Given the nature of the funding, the focus of this project is food orientated, but incorporates all aspects of food from growing, processing, eating and tourism. The project also includes working with the Manufacturing (Industrial & Engineering) businesses that abound in the Murraylands. The role of the Project Manager is to facilitate opportunities between all businesses and promote the regional identity and the positive aspects of the Murraylands. Exporting the Murraylands concluded in June 2007 and formed part of the State Food Plan which has clear objectives throughout this period. The project is underpinned by a quality system which supports businesses to develop export capabilities. All members to the network have the opportunity to participate in many specific related events created through their association with the Murraylands Regional Development Board.

For more information, please contact **Chris Weir, Project Manager— Export and Food**
Ph: 08 85357170 or cweir@murraylands.org.au
